Capture Politics' Report into

Labour's new electoral challenge

The most optimal strategy to beat Reform is to build a progressive coalition

Produces a posible majority compared to a Reform win

Two Options

1. Conversion

Data only relates to 2024 Labour voters

Taking voters directly off Reform

Historical 2017 2015 2019 Labour support Still Labour: 77% 79% 71% Now Reform: 40% 53% 48%

Now Tory: 34% 22%

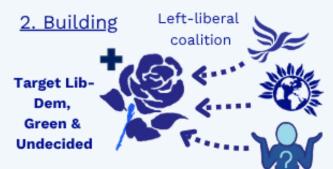

Future support of target voters Probability, 0-10 scale:

Vote Labour: 4.1 Vote Reform: 8.9

Vote Tory: 3.8 Vote Lib/Green: 1.4

Average scores from the question of how likely a person was to vote Labour in 2029.

Historical Still Labour: 77%

Labour support 2019

Now Lib & Green: 66% 50%

Now Undecided: 58% 64% 51%

Future support of target voters Probability, 0-10 scale:

Vote Labour: 6.3 Vote Lib/Green: 8.8

Vote Tory: 1.5 Vote Reform: 1.3

Average scores from the question of how likely a person was to vote Labour in 2029.

Most optimal Strategy

Building a progressive coalition Target Lib-Dem. Green & Undecided

Plan

Current

Data source: British Election Study 2025

Politics

- 1. Highlighting the costs of Reform
- Cost of living & economic narrative.
- Targeting Left/Liberal voters.
- Improve comms on govt competence.

Why target these voters?

- Stronger historical support (2015-'19).
- More likely future support for Labour.
- Similar opinions to Labour members.
- A more favourable view of Labour.
- Prioritise the economy over migration.
